CAREER OBJECTIVE

Aspiring Software Developer with hands-on experience in Java Full Stack Development, building scalable web applications using Spring Boot, React, and REST APIs. Strong foundation in backend development, API design, and authentication mechanisms. Currently working as a Java Full Stack Intern, eager to contribute to building efficient and secure software solutions.

EDUCATION

Bachelor of Business Administration in Computer Application

MIT Arts, Commerce, Science College | 2023 – 2026 | CGPA: 8.24

Senior Secondary (XII), Maharashtra State Board of Secondary and Higher Secondary Education

Loyola High School and Junior College | 2023 | Percentage: 54%

Secondary (X), Maharashtra State Board of Secondary and Higher Secondary Education

St. Felix High School and Junior College | 2021 | Percentage: 76%

SKILLS

Programming Languages: Java, Python, JavaScript, C, C++

Database: MySQL, PostgreSQL, MongoDB

Frameworks & Web: React.js, Spring Boot, Spring Security, Hibernate, Flask, Django, HTML, CSS, REST APIs

Tools & Libraries: Git, Maven, PyTorch, Hugging Face, JWT, Axios

INTERNSHIPS

Java Full Stack Developer Intern @ TechnoSignia - March 2026 – Present

- Worked on backend development using Java and Spring Boot
- Developed and integrated REST APIs with authentication mechanisms
- Implemented secure access control and handled user authorization
- Worked with databases and backend services for application development
- Built and enhanced application features across backend modules
- Used Git for version control and project management

PROJECTS

TaskFlow – Task & Workflow Management System - [GitHub](#)

- Designed and developed a **full-stack task management application** with separate frontend (React + TypeScript) and backend (Spring Boot).
- Implemented **RESTful APIs** supporting full task lifecycle (CRUD) with status tracking and priority.
- Integrated frontend and backend using **HTTP-based API communication**, ensuring smooth data flow and state updates.
- Followed **clean project structure and version control best practices** using Git, with modular components and services.

Tech Stack: React.js, TypeScript, Java, Spring Boot, REST APIs, Git

Role-Based Task Management System - [GitHub](#)

- Built a **secure full-stack web application** using FastAPI and React with **JWT-based authentication and authorization**.
- Implemented **role-based access control (RBAC)**, restricting task operations based on user roles and ownership.
- Developed protected **REST APIs** for task CRUD operations using FastAPI dependencies and token validation.
- Integrated frontend with backend using **Axios interceptors** to manage tokens and handle session expiration gracefully.

Tech Stack: FastAPI, Python, JWT, React.js, Axios, HTML, CSS
